Intersection Improvements at Illinois 53 and Division Street, Part of High-Speed Rail Program

CHICAGO – The Illinois Department of Transportation (IDOT) announced that closures will take place near the intersection of Front Street (Illinois 53) and Division Street, in Braidwood, for an intersection improvement project, beginning, weather permitting, Thursday, April 14. The improvements are part of the Chicago-to-St. Louis high-speed rail program.

In order to complete the work, Front Street will be closed between Main Street (Illinois 113) and Kankakee Street. Division Street also will be closed at the railroad crossing between Front Street and Washington Street. A detour will direct traffic to use Washington Street via the Kankakee Street or Main Street crossings. Washington Street will remain open for the duration of the Front Street closure.

The overall project is expected to be completed in Fall 2017.

Motorists can expect delays and should allow extra time for trips through this area. Drivers are urged to pay close attention to flaggers and signs in the work zones, obey the posted speed limits and be on the alert for workers and equipment.

The upgrades are part of the high-speed rail program to accommodate passenger service between Chicago and St. Louis at speeds up to 110 mph, reducing the length of the trip by one hour. The entire corridor is tentatively scheduled to be complete by the end of 2017. Approximately 150 crossings along the route will be improved to include additional safety features.

For details on other upcoming closures and additional information on the high-speed rail program, visit www.idothsr.org.
